

CommCenter

A bit of a PitA to RE in IDA Pro and appears to be stripped.

However, it appears that if LDM is enabled it logs the following:

- "#I SMS composition during lockdown"
- "#I Temporary 2G enablement not needed. Triggering E911 state enter"
- "#I Emergency Text: Bypassing home country check"
- "#I Emergency SMS will be released"
- "#I 2G was enabled when in lockdown, resetting the preference"
- "2G was disabled when not in lockdown, resetting the preference"

This is obviously responsible for **disabling 2G** support when **LDM** is enabled.

Also allowing 2G for **emergency calls** when **LDM** is enabled.

NEW FS bins

- /usr/sbin/wifid
- /Applications/Setup.app/Setup
- /System/Library/Frameworks/CoreTelephony.framework/Support/CommCenter
- /System/Library/PrivateFrameworks/LockdownMode.framework/lockdownmoded
