# PreferencesUI

You can see in the screen shot that this is setting the text that appears below the Accessories toggle setting.

PreferencesUI

Further down in the instance method -[PSUIPasscodeLockController specifiers] we also can see:

```
AccessoriesPreferenceSpecifier = [PSSpecifier preferenceSpecifierNamed:@"Accessories",
                                             target:self,
                                             set:@"setEnabledInLockScreenForUSB:specifier:",
                                             get:@"enabledInLockScreenForUSB:",
                                             detail:0,
                                             cell:6,
                                             edit:0];
[AccessoriesPreferenceSpecifier setProperty:@"ACCESSORIES" forKey:@"id"];
[AccessoriesPreferenceSpecifier setProperty:@"allowUSBRestrictedMode" forKey:@"MC_FEATURE"];
USBRestrictedModeLocked = [MCProfileConnection isBoolSettingLockedDownByRestrictions:@"allowUSBRestrictedMode"];
USBRestrictedModeLocked_OR_LockdownModeEnabled = [NSNumber numberWithInt:((USBRestrictedModeLocked |
LDMGlobalEnabled) ^ 1)];
[AccessoriesPreferenceSpecifier setProperty: USBRestrictedModeLocked_OR_LockdownModeEnabled forKey:@"enabled"];
```

This is the code that is disabling the Accessories toggle setting so it cannot be changed while Lockdown Mode is enabled.
